

Scully

**Index/
Master**™

Description:

The Scully Index/Master, latest in the Scully "Master" series, is an innovative approach to the problem of remote cueing.

The Index/Master is a digital up/down four decade counter, designed for remote readout of tape position. It's ideally suited for studio recording operation when quick positive return to a predetermined tape location is necessary. It's also applicable to broadcast applications where cueing without audio monitoring is desirable.

Available (factory installed) on new Scully tape recorders, the Index/Master can also be easily field installed on Scully M/S (Motion Sensing) series units.

Features:

- Low voltage segmented readout for wide angle viewing
- Small size for convenient location on operations console
- Designed for retro-fit on any Scully M/S tape unit
- High reliability IC logic
- 30' remote cable standard with each unit

Specifications:

Operating Power: 117 VAC 50 or 60 HZ

Size: 3¹/₂" x 5¹/₂" x 8"

List Price: \$495. Retro-fit kit for Scully M/S series recorders: \$575.
